

CORENDON AIRLINES INFORMATION SECURITY POLICY

Corendon Airlines is committed to maintain an Information Security Management System harmonized with other management systems of the company having in mind that all the information created, used or kept as customer property by the company shall be preserved up to the required information security standards.

Our principles to reach this aim are;

- To meet the requirements of ISO 27001 Information Security Management System standards,
- To comply with applicable Information Security regulations and contract terms,
- To determine risks related to our processes and business continuity; manage them in accordance with “confidentiality, integrity and availability of information” principles,
- To review regularly and continually improve the Information Security Management System,
- To manage information security events and implement required actions,
- To make efforts to increase awareness of our employees and stakeholders,
- To fulfill the requirements of KVKK (Personal Data Protection Law No:6698).

We will supply necessary resources in order to reach information security targets.
