

CORENDON AIRLINES ENVIRONMENTAL POLICY

As Corendon Airlines, we believe sustainable tourism and aviation depends on protection of environment and efficient use of resources.

Our policy is to comply with environmental laws, regulations and standards, design all our processes environment friendly, develop continuously by assigning ourselves measurable targets and always keep our effect on the environment at possible minimum.

Our principles to reach this aim are:

- To continuously comply with applicable national and international environment regulations and other related requirements,
- Keep wastes and noise at minimum and under control,
- Use all natural resources and energy economically and efficiently, prefer use of recycling by using proper materials,
- Reduce the impact of our activities on the environment and human health,
- Promote environmental awareness amongst our employees, suppliers and customers through trainings and guidance,
- Work to prevent the negative effects of our activities on the environment and human health at the source throughout the life cycle
- Use most environmental friendly, sustainable solutions and technologies feasible in new investments and projects,
- Periodically review and report our environmental performance, make necessary improvements to reach our objectives.

We will supply necessary resources in order to reach environmental targets and protect environment.
